Branch Office, 205 Bloor St., Washington, D.C.

The Eureka Coal Company Limited,  
at Leduc, has just recently been formed  
and the company is placing shares on  
the market. These shares of coalmining  
stock in this splendid mine should  
see E. Williams.

## WHO'S WHO AND WHAT'S WHAT

Items of interest in and  
around Coleman

R. Sherwood was in Fernie on Tues-  
day.

W. Stafford left for Calgary on  
Monday.

The "Bon Ton" is the place for pure  
ice cream.

A. J. Blais of Frank was in town on  
Wednesday.

Fresh fruit and delicious ice cream  
at the Palm.

Call at the "Bon Ton" parlors, next  
to Co-Operative.

Ask your merchant for "Luxerine,"  
the soap of quality.

The new outside haulage line at Mc-  
Gillivray is nearly completed.

Patronize home industry. Use  
Chief Laundry Soap."

Robert Holmes has moved into his  
new residence on Mountain View.

Frank Gainey has received several  
large contracts for building houses.

Leave your orders for having yards  
cleaned up at the West End Livery.

The large duck pond has been com-  
pleted for the Foothill's poultry yard.

H. E. Lyon of Blairmore is en route  
to Ottawa on business connected with  
his firm.

J. MacDonald, one of the football  
players, is laid up with a severe cold  
this week.

The Coleman Mercantile report that  
their clearing sale is exceeding ex-  
pectations.

Masonic memorial service in honor of  
the late King Edward VII was held  
Sunday P. M.

Wm. Carr was accidentally injured in  
the mine on Tuesday, while working  
in the pit.

Mrs. Keeliotte has resigned her position  
at the eagle, and will open a board-  
ing house in Blairmore.

R. Hogan is building a new resi-  
dence on Second street east. It will  
be modern throughout.

John Snow who was injured in the  
mine on Monday night is now in the hos-  
pital and is doing well.

W. Pearson received word this week  
that his sister died while in the hos-  
pital, Edinburgh, Scotland.

The continued downpour of rain has  
made possible the raising of an immense  
crop of hay and grain in this district  
this summer.

A. Oliver is building a large frame  
store on Second Street East. He in-  
tends to put in a general stock of gro-  
ceries, drygoods and Men's furnishings.

James Rochester sustained a fracture  
of the collar bone while riding a horse  
on his ranch, which is 40 miles south  
of Lundbreck. He is being treated  
by Dr. Westwood.

Dr. Bruce, a non graduate of Trinity  
University, Trinity, and Royal Col-  
lege of Dental Surgeons of Ontario,  
will make his next regular visit to  
Coleman at the Coleman Hotel May  
22nd, 23rd and 24th.

The Eagles held a splendid session  
last Saturday evening. A large number  
of members were present, and  
after the session was over the mem-  
bers adjourned to the opera house and  
spent a social hour.

The seven year old boy of Mr. Klein-  
ola was once drowned by falling in  
the river last Friday. This is happen-  
ing to other children several times during  
the past year and parents should take  
a warning.

The athletic grounds in Flin-  
ter Park are being fenced with a high  
board fence. This park which contains  
fifty acres is well suited for the les-  
sons and should be advertised in all the  
towns in Southern Alberta.

All arrangements have been com-  
plete for the Ed. I's excursion on  
Victoria Day. A special train will  
run from Hillcrest at 8:30 a.m. and  
return from Cray's Nest at 3:30 p.m.  
The Coleman band will be in attend-  
ance.

Clark's moving pictures were exhib-  
ited on Sat. and Tues. Both exhibitions  
of the varied pictures were well  
attended. The new machine is work-  
ing in order and gives every satisfaction.  
Mr. Clark will put on his  
show regularly and has engaged  
Master Thomas Crawford as soloist.

## MCGILL STUDENTS VISIT COLEMAN

Study Mining in Our Midst  
Special Cars for Them

Professor Porter, one of the ablest  
of the McGill's teachers and scientists  
is in Coleman at present. He is accom-  
panied by twenty five students who  
are getting perhaps the first practical  
lesson on coal mining. The inter-  
national mine has been chosen because  
it presents to students a clear conception  
of a model coal mine. The facilities  
for handling coal are great and point  
to another decided point.

Mr. Whiteside and Mr. Davidson  
have been busy during the week  
demonstrating to their visitors and it is safe to say that the disciples of  
Prof. Porter will return laden with  
practical knowledge.

The students have two private cars  
and they are always utilized in their  
temporary homes no matter how large  
or small the town is.

## Coleman Miner Staff Go Comet Hunting

A party composed of a real  
"sky pilot," a "printers' devil"  
school teacher and a mixed  
throng of journalists ascended  
Saskatoon Mountain on Tuesday  
evening. Halley's comet was  
the objective of the party. About  
11 o'clock it commenced to rain  
and the "grand army of the hills"  
was reduced by having their "pilot" and "devil"  
leave them. This so demoralized  
the remainder of the comet ad-  
mirers that their eyes were  
dimmed when the moment arrived  
for the comet to pass in an  
appearance. At 2:30 the comet  
was discovered by J. B. Harmer  
who by constant watching of the  
"milky way" discovered the  
oncoming traveller at the  
extreme end of a cloud that lay  
over the valley. Upon examination  
the flickering rays of light  
were those of a lantern on Wil-  
son's dairy ranch.

## Canada's Wreath of Maple Leaves

London, May 20—Canada's  
wreath for the funeral of the  
late King will be in the shape  
of a maple leaf. The outside is  
composed of maple leaves while  
across the wreath in dark car-  
nations will be the words "Can-  
ada Mourns." The wreath was  
designed by W. L. Griffiths, Secy.  
to Lord Strathcona. The maple  
leaves were sent to Griffiths by  
Canadian ladies.

## THE TWO COMRADES

Ause That Brought About Most Satisfactory Results.

By MARTHA MC-WILLIAMS.  
Alice made a face at her image in the glass, saying as she shook a dainty fist at it: "You idiot! Why don't you make yourself look as ugly as you feel!"

"I think my dear," Alice Margaret said, sticking her head through the open door behind, "it is because vanity is a trifle stronger with you than apprehension. You think you don't want to marry Charley Cliffe. I know you don't want him to find you a girl."

"Isn't it horrible being so vain with one's whole future in the balance?" Alice said, trying hard to be tearful. Aunt Margaret only laughed. After a little she said, with twinkling eyes: "I have always thought vanity was among the heaven implanted instincts which help to save women from themselves. Now I am sure of it."

"What do you mean?" Alice cried. "Surely you don't, you can't think I'm shamming?" Again Miss Gordon laughed and said: "Not consciously, my dear. The truth is I think you represent the fact that you have no choice in this made to order match."

"Well, wouldn't that gall any girl with such a choice?" Alice asked. And added: Miss Gordon looked thoughtful. "It is unfortunate, as I see it," she said. "That, however, does not alter facts. Instead of cultivating a hostile mind, you had much better be fair. Remember, it is not the young man's fault. The blame, if blame there is, lies wholly with old Mrs. Boynton. She wanted her fortune to go to you two, her step-grandchildren, the sole descendants of her husband."

Added: "She is right, I am afraid. As Charley, whom she petted, would certainly marry somebody it was just as well to put him in the way of marrying you."

"So if I say 'No' he gets the whole fortune, whereas he may 'relinquish' me and keep two-thirds of it?" Alice said. "Aunty, I have the greatest mind to stain my face and dye my hair red and wear a green gown and yellow stock."

"Aunty, you could be much over so much better," some one said, coming through the door. "Me, one tall and slim girl, and you, a plump, muscular dame. Be went straight up to Alice and kissed her upon both cheeks, then took her hand and led her. What a beauty you have turned out to be!"

"Why didn't I come straight to see you? Nan, dear, I'm in the confessional. I've gone and courted another girl without ever giving you a chance!"

"How jolly!" Alice cried. "With all that nonsense out of the way I am awfully glad to see you. I remember you are a real nice boy ever so many years ago."

"I think you were a tartar, and I know you were ugly," Cliffe said, his eyes twinkling. "That's why I made up to the other one. What have you done to yourself? The girl I left behind me was sallow and scrawny and green eyed, with her hair to speak of, and fingers like dingers."

"And just up from six weeks of re-convalescence, shaking mites off yellow brown curst at him. 'I have spent a hour a day since forever, fitting how I looked just then. If I had known how faithfully you remembered me!'

"Well, what?" Cliffe asked as she made a tentative pause.

"Oh, nothing!" Alice returned. "I suppose you shall make myself live up to your expectations."

Cliffe laughed, then ran on: "Now that under our grandpa's nightmare of a will we have duly arrived at years of indiscretion, let's settle money matters out of hand. I'm going to relinquish you in the presence of witnesses. You may marry whom you please for me, and I shall also give you half the money!"

"O, I think you are a dear!" Alice interrupted, dimpling all over her rosy face. "And you'll stay here a month, and we'll be the best comrades going. You'll tell all my about your sweet heart!"

"On one condition," Cliffe broke in, "that you get engaged to somebody before I go away."

"You are a trifl unreasonnable." Alice said with a softy brilliant smile. "I want to be free-free as air for six whole months—before I even think of boudoir."

Comrades the two became, comrades to close and congenial. Miss Gordon looked after them sometimes with eyes that were not quite clear. "They were made for each other and will find it out too late," she said in her heart. Outwardly she kept silence. Fate has taken up the cards, and she had no time to try crossing the deck.

Cliffe spoke often but he broached, but always vaguely—she was as high as his heart, her eyes the color he loved best in all the world. When the wedding day was set Alice and Aunt Margaret should know. He had no sort of doubt they would come to love his sweetheart as she so well deserved. Now and again he gave them messages out of her letters. Alice was insanely curious to read one of the letters through, but Cliffe would never let her do it.

The month wage almost ended. Next to the last day of it Cliffe rode with Alice up Round Top to watch the sun go down. It was Indian summer weather, with all the air full of warm haze and dewy rip autumn mists.

Pepain and its Uses. Pepain is an active ferment present in the gastric juices which has the property of converting the protein elements of the food into a soluble form. It is known to be one of the aluminous or nitrogenous organic substances, but has never been satisfactorily isolated, and its presence is known only by its effects. Pepain requires for its action the presence of an acid and moderate warmth. As used in medicine it occurs in a fine yellowish white, porous powder or granulated granules or tabs. It is extracted from the glandular layer of the stomachs of freshly killed pigs and should be capable of digesting not less than 8,000 times its own weight of albumen. It has, however, been isolated in such a pure form as to be able to digest 25,000 times its own weight of egg albumen. The use to which it is put is to aid the gastric action of very old or feeble persons where the gastric juice is defective.

New York Americans.

They went slowly, he leaning toward the girl all up the long slope. At the top he dismounted and held out his arms to her, saying a little huskily: "Come I will carry you to the very tip of the rocks."

Alice felt him tremble as she slipped into his arms. Her own heart beat furiously. She was beginning to find out what his presence or his absence would mean to her life. She smiled at him bravely when last they stood hand in hand upon the craggy pinnacle. The sun sank, a globe of crimson, filling the whole world with rosy radiance. In that transfiguring illumination Alice had the face of an angel, serene, transparent to inner light. Cliffe held his hand softly over hers and said very low, "It is hard to go down from all this to utter darkness." As he felt her shiver faintly he said on, "Alice, must a man suffer his wife's life, now because of a mistake?"

"I do not know what you mean," Alice said untruthfully, turning away her telltale eyes. Cliffe caught both her hands. "I think you do know," he said. "Anyways you know we love each other. Now, the question is, What shall we do?"

"Easily," answered—for you," Alice said, "you are the ones going away—to keep your wedded word."

"But you and my heart? Dare I leave both behind me?" Cliffe said very low, his voice thrilling strangely.

"I could not love thee, dear, so much loved I none more," Alice quoted almost under breath. "We—we are comrades," she ran on a little tremulously. "Comrades stand by each other, keep each other up to the mark."

"Comrades indeed and sweethearts and shall be plighted lovers," Cliffe cried, catching her to him in a breathless clasp. "Alice, darling, forgive me, I deceived you. I said I had courted another girl and spoke the truth. But it was with the understanding that she refuse me. I had your picture, dearest—even that bad take me captive—but I knew you well enough to understand how little chance there was of making you love me if I ap-pealed to you on that score."

"I kept it up thus long because—well, because I wanted to find out how well you loved me. Dear heart, sweet one, say you forgive the comrade who tricked you because he feared to lose you."

"I do not see anything to forgive," Alice said, nestling to him with a little happy smile.

## The First Gold Rush.

The first gold rush to the Americas, of which is uncertain, was probably a rush for gold, to be collected in fleeces placed in the torrents flowing down the banks of Mount Cassius. But older much was the westward movement, which Chaldean records of 3800 B. C. chronicle, to the gold bearing land of Meluhka, after the flood as Meluh.

Later on, in Britain, at a very early period, there was a rush from Egypt to a spot inland from the present Sinaia. Long afterward this was described by Diocletian Siculus, who left a map, still extant, showing the wells provided for the gold seekers between the Red sea and the mines.

About 1000 B. C. there seems to have been a great gold rush in search of gold into South Africa. Its cause can only be guessed at from the extensive remains that still exist, but it has been calculated that at least \$50,000,000 was secured by these early adventurers.

In modern times the first rush was that to California in 1848.

## Sea Birds.

Taking the birds all round, they are far more carnivores in their nesting than their cousins elsewhere. The skua, the puffins, the black-throated diver, the gullion, make no nests, properly so called. The puffin, however, usually burrows a rabbit burrow, and is not particular whether its original owners have done with their home or not. If they interfere or even try to peck a pack from the puffin's nest, the puffin will not only drive them away but will also give the bird a good amount of chewing before the feed can be swallowed, and this mastication grinds the grain and mixes it with the saliva, greatly increasing the portion digested.

The seeds of milo are small, and where the threshed seed is fed to horses it is chewed very little, and the grain passes through the horse's digestive system. Feeding milo in the head saves all expense of preparation, and the small stems of the head eaten with the grain seem to aid in diluting the grain in the stomach, making it more digestible.

## FOR CHURNING RESULTS.

## Careful Heating of Churning Room and Cleanliness Necessary.

There can be no definite rule laid down as to the temperature at which the cream should be churned, as different creams require different temperatures. The fat is in the form of microscopic globules, and they must have a certain degree of softness if they are to be easily handled. The cream and the churn that is properly churned and contains 30 to 35 per cent fat, the temperature should be such that the cream will churn in thirty to forty-five minutes. This will give an exhaustive churning and leave the butter in a condition in which it can be easily handled without injuring the texture.

Before putting the cream in the churn the churn should be thoroughly washed and as thoroughly chilled with cold water. The advantage of this is that it will freshen the churn and fill the pores in the wood so that the cream and butter will not stick to it. The outside temperature of the churn-

MAKING READY TO CHURN.

ing room should be as nearly as possible the same as the churning temperature. If it is warm the cream will warm up rapidly, and the butter will likely be soft and will require more churning. If the temperature is cold it is useless to lower the cream rapidly to the churning point just before churning. It should be there at least two hours before churning. The reason for this is that fat is a slow conductor of heat, and, although the thermometer reads 60 degrees, the thermometer reads the right temperature the fat is not actually reached if it and the results would be the same if churned at an actually higher degree.

## Mile Mais for Horses.

The farmer who plants a good acreage of milo has practically insured for himself a good supply of grain for his work teams. Horses and mules have stood hard well all summer, such as breaking plow, with grain but milo, horses doing heavy feed work, should be given the grain feed of mile grain a day. Mile in the head is usually fed, one-half more heads being given at a feed than would be given ears of corn. Most teamsters prefer to feed milo in the head to horses, cutting the main stem off close to the head. The main stem of the head and the many little stems that hold the corolla of the flower together, are easily cut out that while the corolla of the priestess is indeed no longer to be found in the case, her soul has returned and occupies it.

But others, more familiar with the ways of the Egyptians, hold the stem firmly out and pull it off, and this mastication grinds the grain and mixes it with the saliva, greatly increasing the portion digested.

The seeds of milo are small, and where the threshed seed is fed to horses it is chewed very little, and the grain passes through the horse's digestive system. Feeding milo in the head saves all expense of preparation, and the small stems of the head eaten with the grain seem to aid in diluting the grain in the stomach, making it more digestible.

## THE SHEPHERD

Grade the flock just as carefully as you grade the dairy herd. Weed out the poor animals and keep the best.

## Judicious Feeding Necessary.

A flock will go through a winter sheltered by an open shed, but no flock ever came out of a winter in thrifty condition without judicious feeding.

## Shearing Machines' Worth.

Shearing machines beat shearers every time. They are not expensive, though they cause fewer wounds and do the work more evenly than the average farmer can do with the old fashioned shears.

## Easy to Build a Feed Rack.

A good rack for feeding sheep can be made by almost any sensible farmer. About all that is needed is a support for the hay so that it shall not fall to the ground and be wasted and also be handy for the sheep to get at.

## Gains in Lambs.

Lambs which are well cared for in the spring and later have a much better growth than those which are not. Good grass above six months old should average from 80 to 100 pounds and at eighteen months, with good care, should average 150 to 160 pounds.

## Attend to the Wounds.

Sheep become infested on wire fences or other objects. Watch the wounds carefully and if maggots appear wash the wounds with a weak solution of carbolic acid and water. If the wound is deep and difficult to reach, dilute the solution with a small glass of vinegar.

## WORLD'S OLDEST JONAH.

## THE MALIGNANT MUMMY IN THE BRITISH MUSEUM.

The Hoodoo, However, is a Lady and Her Name Was Princess Hetare—She Put a Curse on the Man Who Should Disturb Her Remains and His Won Out—Ordered Out of the British Museum.

What is perhaps the oldest hoodoo on earth was until very recently in the British Museum. After some 3,000 years of misbehavior the hoodoo was generally avoided by the Egyptian room altogether. The English papers soon became full of letters from important citizens who came up to the gates of the famous Hetare and the entrance to the British Museum.

Before putting the cream in the churn the churn should be thoroughly washed and as thoroughly chilled with cold water. The advantage of this is that it will freshen the churn and fill the pores in the wood so that the cream and butter will not stick to it. The outside temperature of the churn-

Within a year the photographer committed suicide.

Then it was found that the man who had taken the case to the museum had been murdered. Edward Black, who lived in Whitechapel, and who had carried it into the building, had been run over by a train and had both legs cut off. The authorities of the museum tried again to have it photographed, and the camera man fell, smashed his camera, and cut his face open. The same day one of his children had a narrow escape from drowning.

All of these things happened before 1905. Since then the story of the famous hoodoo has been well chronicled, and visitors to the museum have generally avoided the Egyptian room altogether. The English papers soon became full of letters from important citizens who came up to the gates of the famous Hetare and the entrance to the British Museum.

How far the activities of the malignant hoodoo continued in these theories may be a matter of doubt, but it is a fact that they have at last directed the removal of the uncanny box where it will no longer be offended by the public gaze. It will be interesting to see what the trustees of the British Museum will do with this.

## GUARDIAN OF 384 CHILDREN.

## Public Trustee Managing Estates of Tramp and Millionaire.

A most interesting address was given at the Society of Arts in London recently by Mr. C. J. Stewart, the Public Trustee.

In summarizing the extraordinary area of responsibility to which he has already succeeded, Mr. Stewart said he is concerned already, with the Public Trustee's care of the estate of the Prince of Wales, who has been known to the world as the 'boy king.'

Through the researches of certain savants who became interested in the uncanny manifestations in the early history of the origin of Egypt, it is known that Hetare, the name of the Egyptian Princess Hetare, was one of the daughters of Amen-Retep III., perhaps the most famous Egyptian King of the 18th dynasty. Hetare was a profound worshiper of the great sun god, Amen-Ra, and the beautiful Hetare was brought up in the same faith. At the age of 21 she was married to a son of Amen-Ra, a deceased person; with 300 people still living; with 1,000 settlements affecting about 5,000 families, and an estimated wealth of \$300,000 worth of estates, and a sum measure responsible for the up-bringing of no fewer than 384 children.

His duties concerned the estates of testators who varied in their wills from an ordinary citizen to a millionaire.

That the experience of the Public Trustee is not limited to one class or to strict administration of cases was shown. An applicant was desirous of securing his savings for his little daughter, nine years old. He added, "I have no permanent address, nor a fixed occupation—I am a tramp. From this the Public Trustee advised to sell or to let the property he had won. One client, a wealthy widow, was given a rich case but her royal birth would seem to have entitled her to the services of a lawyer.

For centuries afterward the Egyptians attributed the famines and droughts which from time to time oppressed the land to the wrath of the god at the destruction of Hetare from his priesthood.

The exhibition in the British Museum to-day is not a 'mummy,' but Unintelligent? Well, that's the question. Some there are who boldly assert that the box is as empty as a vase. But others, more familiar with the ways of the Egyptians, hold the stem firmly out and pull it off, and this mastication grinds the grain and mixes it with the saliva, greatly increasing the portion digested.

The seeds of milo are small, and where the threshed seed is fed to horses it is chewed very little, and the grain passes through the horse's digestive system. Feeding milo in the head saves all expense of preparation, and the small stems of the head eaten with the grain seem to aid in diluting the grain in the stomach, making it more digestible.

In another case a lady required the department to look out her trains for her and when everything had been done and when she was ready to leave, the Public Trustee reported that "the guard was most attached and had a carriage for us labeled 'Ladies only.' My daughter, however, did not appear to appreciate his attention."

## Who's Be a Teacher?

What is wrong with the scholastic profession? Something, evidently. For even the British National Union of Teachers has issued a strong manifesto warning parents of the risks of their children becoming teachers. They say that after ten years as a pupil-teacher, the money earned is insufficient to provide board and education; that residential colleges entail great expense; and that a child must remain at school till sixteen and then be rejected.

In July, 1908, 4,324 teachers left the training colleges; three months later 11,226 were without employment, and a still uncollected sum of £4,836 students who left training colleges in July, 1908, were still looking for work in October.

## A Linguist on the Bench.

Judge Bacon of the Bloomsbury Eng. Co. Court, a well-known linguist, reaching his court from the foreign quarters of London over which he has jurisdiction. "Let a man speak his mother tongue and he will be understood," he said. "If we interpret him, we do not understand him, and if he does not understand us, we do not interpret him." The thief had at least left an open window.

But the grievously offended Hetare was not satisfied. Whether she had left the case of her own accord or had been stolen, she did not propose to let the master of the house remain in the case. "We examined, but were able to prove that the entire innocence of the thief, and finally it was decided to give up the chase, and he was satisfied that the thief had at least left an open window.

But the Hetare was not satisfied. Whether she had left the case of her own accord or had been stolen, she did not propose to let the master of the house remain in the case. "We examined, but were able to prove that the entire innocence of the thief, and finally it was decided to give up the chase, and he was satisfied that the thief had at least left an open window.

With the death of the last case party, the Hetare was released. Right away she passed it into the hands of the British Museum. A photographer secured permission to take a picture of it. But when he descended into the crypt he found it was hidden within the folds of the Egyptian Queen. The strange woman was in long white draperies, and instead of the painted face on the queen, a face of a particularly malevolent expression. Quite a few photographs were struck off, and these have become exorbitantly rare.

## Origin of the Word 'Sterling.'

The origin of the word "sterling" is very curious. Among the members of the nobility in northern Europe were the dwellers of eastern Germany. They were so skillful in their calling that numbers of them were invited to England to manage the royal mint.

A friend of mine advised me to try PSYCHINE, and in three days I felt like a new man again. I desire to let others know that he did not die, and it is not well again, and for the sake of others who may be ill, you may take this treatment.

## "THE DEAD HAS COME TO LIFE" &amp; "FRUIT-TIVES" MIRACLE.

MRS. JAMES FENWICK.

Bethesda, Ontario, October 1st, 1908.

"I suffered tortures for seven long years from a Water Tumor. I was forced to take morphine constantly to relieve the awful pains, and I wanted to die to get relief. My doctor gave me no hope. My friends hardly expected my death. Then I was induced to take 'Fruit-tives' and this wonderful fruit medicine has completely cured me. When I appealed on my behalf to my friend, he exclaimed 'The dead has come to life.' The cure was a positive miracle."

From a druggist in Limited, Ottawa.

Victoria Daniels, a nineteen-year-old Chicago girl, is the champion holly wreath maker of that city. She made 302 holly wreaths in one day of retail sales, exceeding by sixteen the record of 330 made by Emma Vogel of

Chicago.

Miss Helen Taft, daughter of the president, is a pretty girl, with blue eyes and fair hair. She is a fearless horsewoman, a tireless rider and the winner of a scholarship which she is proud to think would enable her to continue her studies if she were to be thrown over her own resources.

Miss Alice Paul, the American girl who was sentenced to an English prison for taking part in the recent suffrage strike, has been granted a pardon by the King of Moorseet, N. J. She took honors at Swarthmore College, later had a postgraduate course at the University of Pennsylvania and then went to England, where she was studying when she became interested in the equal franchise question.

**Sporting Notes.**

Syracuse ice racing light harness clubs will unite.

The Boston Americans are after new grounds for 1912.

Cornell has won eastern cross country runs ten times in eleven years.

Alfred Shrubz has won ninety-five out of 101 races since coming to this country nearly three years ago.

James A. Murphy of New York has bought his old, low Star Pointer, 1,200 lbs., and the first two minute paces is certain to be a good home as long as he lives.

Dan Patch, 1,354 lbs., has covered more than 70,000 miles since going into the exhibition business. What has been announced as his final appearance in public took place last Thanksgiving day at Los Angeles, where he scored over Minor Heff in 2:154.

## Three Kings.

The German emperors is very popular with officers of the imperial army. His nickname among the German soldiers is Herr Lehmann.

Engel Edward was recently awarded four first prizes for his exhibits at the Smithfield cattle show. His majesty is a tenant farmer, not a landlord, and pays a large sum every year in rent and taxes for his holdings.

King Gustave of Sweden tried to find out the facts concerning the recent shooting in his country, but without complete success. Now he distributes himself and works among the aristocracy of various sorts unknown that he may have knowledge of actual conditions at first hand. Recently he carried sacks of coal as a stevedore for several hours.

## BRONCHITIS.

If Neglected, it soon reaches the lungs and may prove fatal.

Mr. G. L. Garver of 116 Madison St., Toronto, writes date of September 13, 1908. "One year ago this spring I contracted a severe cold in the chest, which developed into bronchitis on to the wicket with a handle of nail and a hammer to tighten the matting. Charlie Blithe took him to the centre of the matting, and told him to put his hand on the wicket on the spot which he did, and he had no difficulty in getting well again, but that everything was right. Of course, they had to be removed before a start could be made.

Blithe's Practical Joke.

According to David Denton, the Yorkshire cricketer, who has been touring South Africa with the English team, Blithe, the Kent bowler, likes a practical joke. Previous to one match he caused some damage on to the wicket with a handle of nail and a hammer to tighten the matting. Charlie Blithe took him to the centre of the matting, and told him to put his hand on the wicket on the spot which he did, and he had no difficulty in getting well again, but that everything was right. Of course, they had to be removed before a start could be made.

Blithe's Practical Joke.

The origin of the word "sterling" is very curious. Among the members of the nobility in northern Europe were the dwellers of eastern Germany. They were so skillful in their calling that numbers of them were invited to England to manage the royal mint.

PSYCHINE, PRONOUNCED SI-KEN

## It Was Dizzy Spells Gave the Warning

Fainting Also Alarmed Her — Now Strength and Energy Are Restored by DR. CHASE'S NERVE FOOD.

Pain is often a blessing in disguise. For when you suffer you get in earnest about who you are.

Many who are in a really serious condition from nervous exhaustion do realize they are in danger because they have no pain.

They are weak and easily fatigued, their digestive system lacks the necessary vigor to digest food, appetite is gone, and there is a general lack of energy. Some even have dizzy spells and fainting spells, as had the writer of this letter, before realizing the danger they are in.

To such helplessness or some form of paralysis is liable to come at any moment.

Why not take definite action today so that restoration may begin at once. You can get Dr. Chase's Nerve Food at almost any store where medicine is

sold and can be sure that every dose brings you so much nearer to health and vigor.

Mrs. Edwin Martin, Ayer's Cliff, Ontario, writes: "For a long time Dr. Chase's Nerve Food, I was in an terrible condition, dizzy spells would come over me and I would fall to the floor. I could not so much as sweep the floor without falling. My memory was all gone down."

"Doctors failed to help me so turned to Dr. Chase's Nerve Food. I soon felt that it was a God-send to me. I began to feel better and was restoring my system. I can now wash and do the housework without difficulty and give all the credit for the cure to Dr. Chase's Nerve Food."

The good doctor's own Nerve Food has a portrait and signature of A. W. Chase, M.D., the famous Receipt Book author, 50 cts. a box, all dealers or Edmaston, Bates & Co., Toronto. Write for free copy of Dr. Chase's Recipes.

**YOU** would soon get rid of a servant who did only half the work in double the time of a capable one. Then why continue using a flour that gives half the nourishment and double the work to digest?

## Ogilvie's Royal Household

is made from selected spring wheat—a wheat that is rich in nutriment. It is the whitest and finest flour made; it makes fully one-third more bread to the pound than any soft wheat flour and is more dependable in every respect.

Good Enough

Wife—I suppose if you should meet some pretty young girl you would cease caring for me.

Husband—What nonsense you talk! What do I care for youth or beauty? You suit me all right.

Don't attempt to wear a halo until you get your wings.

Overworking the Mater

Mother—Come, William, quick! Minnie has tried to kill herself by halting gas!

Father—Good heavens! What think what I care for youth or beauty!

A girl's family tries to run her love affair with a man and she succeeds in running him with her.

## BRITISH LABOR EXPERIMENT.

Official Exchanges Assume Task of Finding Work For E. I. Ides.

An interesting experiment in practical economics has been undertaken in Great Britain, namely the establishment of official employment bureaus in London and the other large centers of Great Britain and Ireland, where employes of labor can find all the help they need, and wage earners of any class may register and make known their wants without the payment of any fee. It is thus proposed by the Government to bring the employers and the unemployed together on an official basis, and the arrangements are such that opportunities for employment in any part of the kingdom will be given to all, and to all of the exchanges as the agents are to be called, and posted in a prominent place for the information of those who may concern themselves.

The Government does not undertake to recommend or to give any information further than that which is communicated by the persons directly involved, and will assume no responsibility, but will merely act as a medium of communication. This is of considerable curiosity as to how the scheme will work and the labor unions generally are skeptical as to its practicality.

"But the undertaking is a benevolent one and should be well supported."

Daily reports will be made from each of the exchanges to headquarters, and so far as so many men who cannot find employment in one locality will be advised as to the outlook in other districts. In case employment is offered by the local people, railroads and other well-furnished workmen of good character to such places and the cost collected from their second month's earnings. It is proposed to erect buildings in convenient locations as permanent headquarters for the exchanges. Attention will be given to finding employment upon farms for boys whose physical condition will permit them to do manual labor, and those who are physically unable to work will be certified to hospitals and sanitariums, where they can receive proper treatment. The general superintendent of the system of exchanges will be appointed by the government authority on labor questions and author of Unemployment.

The success of the enterprise will depend entirely upon the co-operation of the workers. It is proposed to ignore the new exchanges in seeking help it will be useless for the unemployed to make application. Many of the labor unions are hostile to the plan, as they consider it to be distrustful of an agency that can employ any number of laborers and mechanics at any time they may be needed for any purpose. They argue that the workers, through the hands of the Government, an instrument that will defeat any strike at short notice. But the law establishes no exchanges except for strikes, and the strike leaders should not be furnished.

An interesting link.

One curious incident in the siege of Badajos may be related. The day after the assault two Spanish ladies, the younger a beautiful girl of fourteen, appealed for help to two officers of the rifles, who were sent through the streets of the town. Their dresses were torn, their ears, from which rings had been roughly snatched, were bleeding, and to each girl he said: "Don't despair yourselves on the protection of the first British officers they met." One of the officers was Capt. Harry Smith of the rifles. Two years later he married this girl, he having been released from Capt. Harry Smith in after years served at the Cape as Sir Harry, and this Spanish girl, as Lady Smith, gave her name to the historic town which George White defined ton such stubborn valor—"Wellington's Men."

Going One Better."

"Ma father's a soper," said a little Scotch lassie.

"An' ma father, too," said her mother.

"Ah, but ma father's a brave man. He's been in war, an' he's got a hal gang o' medals. An' he's got the Victoria Cross. The King pinned it on him, an' he ain't had it breathless announced No. 1."

"An' ma father's braver!" cried the other little one. "He's been in dozen o' wars, an' he's got a hal gang o' medals, an' Victoria Crosses. An' he's got a bonnie wudderleg, an'—with a triumphant shriek—"The King nailed it on wi' his ain hand!"—London Exchange.

How Those Lords Love Each Other.

Lord Lansdowne once congratulated Lord Crewe on an eloquent speech in the House of Lords.

"I have followed it," he said; "with earnest attention, not only on account of the importance of the subject, but also on account of the noble lord's judicial attitude. I admired his eloquence, but what impressed me most was his impartiality."

"I paused only till the last minute. I did not know on which side of the fence his lordship was coming down."

The Wanderer Scott.

Volume and quality both considered, Sir Walter Scott was probably the most popular writer ever known. More than 10,000,000 copies of his "Life and Works" have been printed, and the demand is by no means exhausted. Within five years after the first of "Waverley" was published he was read by all Europe and America, and the annual profits of his novels amounted to more than \$20,000.

A Woman's Bank.

A novel departure in British banking will be inaugurated shortly with the opening of a woman's bank, officered and conducted exclusively by women and catering only to women customers. The only main partner on the premises will be the manager, and one of his functions will be to keep other men away. He may be a depositor or trustee business with the new institution.

Apply Zam-Buk to all wounds and sores and you will be surprised how quickly it stops the smarting and brings ease. It covers the wound with a layer of protective balm, kills all poison germs already in the wound, and prevents others entering. In rich oil base it is easily absorbed and leaves the skin smooth and fresh thence and in a wonderfully short time the wound is healed!

Zam-Buk's popularity is based on merit. Imagine a man who has been captured and is returning to London, and the Queen's Guard went through the Boer war, receiving the Queen's and King's medals and clasp for "Diamond Hill," Modder River, and Spion Kop.

The document went on to tell how Hayes was promoted corporal on the field.

"For courageous conduct in the firing line he was later at the Battle of Eastern Transvaal, was the means of saving twenty of my comrades, who would have been either killed or captured. For this I received the rank of lance corporal, and the Queen's Guard went through the Boer war, receiving the Queen's and King's medals and clasp for 'Diamond Hill,' Modder River, and Spion Kop."

The writer of the biography was a member of the Royal Irish Constabulary, and was compelled to force to take part in the Jameson Raid. He was sent back from Cape Colony with others when the leaders were captured, and returning to London, joined the Queen's Guard, and went through the Boer war, receiving the Queen's and King's medals and clasp for "Diamond Hill," Modder River, and Spion Kop."

He was promoted corporal on the field.

#### Building a City

Lethbridge is to have a door and sash factory. The Hon. Cushing having signified his intention of opening up an establishment there. Lethbridge has several advantages that are important viz: a centre of a populous district and cheap fuel for heat and power. The only drawback is the distance from sawmills. There is no other industry that would be more suitable for Coleman. Here we are in the midst of six towns, we have the cheapest fuel in the West and are surrounded on all sides with timber that is particularly adopted for raw material as used in the production of doors and sashes. If the town were to present or purchase a suitable site, it should be a sufficient incentive and sufficient assistance to an industry, such as the above.

We have the raw material for many industries. Capital would be wisely attracted and the result would be, not only gratifying to the investor, but extremely beneficial to Coleman.

The brick clay deposit which lies almost within the boundaries of Coleman is to be utilized. There is a splendid market in the Pass for building brick and cement, especially if the contractors build of clay pipes.

#### Sir Wilfrid's Visit

Sir Wilfrid Laurier will this summer visit the West. It is now some years since he last accompanied the present King on his tour of the Empire. Since his last visit the prairie has become dotted with a hundred thousand more homesteads and a thousand more towns. The increasing and growing importance of the West is driving Canada's financial pulse quicker and steadier as every crop is harvested.

Our Canadian Premier can not know too much in general or too little in detail of this land Empire, a real acquaintance of the people and country is essential to all good government. And good government always promotes progress. Sir Wilfrid's visit is timely and advantageous to the West.

The legislature meets again on the 26th, and it is expected that the agreement with Clarke will be annulled. It is also expected that Premier Rutherford will pull through until the end of the session, when he will be appointed Lieutenant Governor. Either Cushing or Sifton will be called on to lead the Government force.

Another meeting will be called next week for the purpose of taking the next step of incorporating Coleman and West Coleman into a town. Those who really desire incorporation should make it a point to be present with facts that cannot be gainsaid. It is sometimes very easy for the blocker to injure a worthy cause.

Sir Wilfrid will capture the West with his sunny smile.

### Waterways Commission

Edmonton, May 20.—Mr. Walsh said this morning that the investigation would probably not be finished next week, which means that it will still be in progress when the legislature convenes May 26. Mr. Walsh says, however, that the investigation need not interfere with the House proceedings as most of the government officials will be examined before the opening of parliament.

Premier Rutherford will probably be placed on the stand Wednesday. About a dozen witnesses are to be examined. One of the most important will be Cecil Soddard, one of the engineers who has charge of contracts of the feed of the construction of the road. The long trip which the commissioners had to make returned does not appear to have disturbed their health. Mr. Johnstone, assistant counsel for the commission, said this afternoon that he is feeling much fit for a long siege of cross examination than before he left for Winnipeg.

Incidentally the trip was probably a record breaker so far as royal commissions were concerned. The investigators left here April 23, and so have been gone about three weeks, during that time they have travelled 3,640 miles and examined eleven witnesses, ten in Winnipeg and one in Toronto. This is at the rate of one witness to every 425 miles, which is going some. Mr. Walsh regards the trip as worth while, in fact he says the most important testimony obtained on the trip was that of J. D. M. A. Thor, the contractor, who referred to the contract with Clarke to be built in the road because Clarke wanted to saddle \$450,000 of preliminary expenses on the construction company.

## FORESTRY BRANCH

### DEPT. OF INTERIOR

PRESS BULLETIN No 9  
Forest Products of Canada, 1903" is the latest bulletin issued by the Forestry Branch of the Department of the Interior. It comprises the result of the first year's work of the Division Forest Service in the compilation of statistics relating to the production and consumption of the Forest products of the Dominion. Messrs. H. R. MacMillan and G. A. Cutches are the compilers of the figures.

This work was undertaken by the Forestry Branch with the object of meeting the long-felt want as to reliable statistic relating to the use of wood in Canada, more frequent than the census figures, which are published every ten years.

The returns do not profess to be complete, but are thought to be reasonably accurate, and at any rate give a fairly exact idea of the quantities and values of material and product in the different lines.

The work was new, both to the manufacturers and to the officials of the Branch, but in future years, as it continues, it is hoped to have much more complete and reliable returns. Copies of the bulletin may be obtained gratis by applying to the Superintendent of Forests, Ottawa.

The TOTAL VALUE of the production of lumber, laths, shingles, crossies, poles and pulpwood during the year was \$67,425,044."

The production of sawn timber is shown by the figures to be in the neighborhood of 3,348,750,000 ft. board measure per annum, valued at \$54,358,093. In this Ontario leads with a production of 1,294,704,000 ft. valued at \$24,398,077, Quebec being second with 900,135,000 ft. of the value of \$16,838,008 and B.C. third with 617,977,000 ft. worth \$9,107,188. The other provinces rank in the following order: N.B. 305,400,000 ft. valued at \$4,061,402; N.S. 216,825,000 ft. of the value of 122,787,793; Saskatchewan 91,100,000 ft. worth \$1,575; Manitoba 55,445,000 ft. value \$807,000; Alta. 41,382,000 ft. value at \$503,244.

The total production of wood-pulp is 333,079 tons made from 482,777 cords of wood and valued at \$2,031,053.

### SHINGLES

B.C. easily leads in the production of shingles producing 724,052,000 of the value of \$1,391,306. Its nearest competitor is Quebec, which produced 406,440,000 valued at \$840,787 and then follow, in the order, Ontario with a production of 223,533,000 valued at \$461,155; N.B. 109,013,000 worth \$25,865; N.S. 33,141,000 worth \$6,370; Manitoba 112,000,000 worth \$3,150 and Sask. 592,000 worth \$1,393.

The total production for the Dominion was 1,469,390,000 shingles; the aggregate value of which was \$3,101,990.

### LATHES

In the manufacture of laths Ontario takes first place, with 203,241,000 to her credit, valued at \$612,856. Little more than half that number, viz.: 132,991,000, is made by her nearest competitor, New Brunswick, the value of which is \$28,088. Quebec made 92,014,000 laths, worth \$189,074; British Columbia, 81,881,000, worth \$208,255; N.W.T. 62,683,000, worth \$136,983; Saskatchewan, 18,477,000, valued at \$40,173; Manitoba, 7,576,000, at a value of \$10,200 and Alberta, 1,099,000, worth \$3,534.

The total number of laths manufactured was 671,562,000, of the value of \$1,487,125.

### RAILWAY TIES

During the year the railway purchased 13,076,416 creosote ties, for which they paid \$5,281,062. Of these, seven railways (47 in number and having a total of 25,771 miles of track) bought 13,738,157, paying therefor \$5,189,074, and the other railroads (numbering 32 and having 818 miles of track) purchased 240,259 ties, costing \$92,011. Cedar (including girders) ties both eastern and western cedar) is easily the favorite wood for tie, twice as many ties being of this species as of any other, while hemlock and tamarack in a close equal numbers are next place.

### POLIES USED

Reports to the poles purchased were received from 46 telegraph and telephone companies, 151 electric light, power and railway companies and 19 steam railways owning their pole lines. These represented 69,544 miles of line, supported by 2,433,345 p.h. These companies bought a total of 185,307 poles, paying for these at the point of purchase \$2,511. Of the 185,307 poles 102,211 way of credit, the other we do used being tamarack spruce and Douglas fir.

## CIRCUS COMING

### Barnes Circus A Novelty

An oft heard remark in connection with Circuses is, "that if you see one Circus you have seen 'em all." This may be true in a measure, of the ordinary Circus, but the Big G. Barnes Big 3 Ring Wild Animal circus is different in every essential from any Circus that has ever visited Coleman.

There is all the barbolic splendor, all the life and fascination of light and color that surrounds the other tents, shows with the additional novelty of wild beasts taking the place of human beings as performers.

All Circuses have high-salied equestrian stars, whose names are printed in big at the bottom of many colored posters, who are paid fabulously.

This is not the only novelty on the two hours program, every minute of the time contains a thrill, a laugh or a sensation.

In one number the immense arena is filled with leopards, panthers, jaguars and pumas; a frail young woman resembling a dainty Dresden China statuette, enters this den of snarling, biting, scratching, jungle-beast wild beasts, who at her behest form pyramids, trileaux, walk, walk the tight rope, toll bells, and, as finally eat raw meat from her naked hands, and just

These are only two acts, taken at random from the list of twenty—one big numbers that make up the program of the Barnes Circus; every one absolutely new and can be seen only with this show.

DON'T FORGET. The Barnes Big 3 Ring Wild Animal Circus comes to Coleman for three days, June 18-19-20 rain or shine. Under the auspices of the Coleman Fire Department, salaries for a few minutes work at each performance; but the Barnes' show lead in that its premier equestrian is a full-grown male African Lion, who appears after every performance riding a blooded African stallion.

## Local News

The Help in Hand B chapter held a social in their club rooms on Thursday evening, Mr. Williams read a very interesting paper on the Christian and church work, emphasizing the need of unselfishness and helpfulness. A lively discussion followed in which many of the members took part. The Brotherhood holds its regular meeting every Sunday at 3:45. They have commenced to study Paul's great epistles to the Romans. All men are welcome.

Eagle have arranged for an elaborate page to be held at Andy Good's resort at Crow's Nest on May 24th Victoria Day. A great reduction of rates on the C.P.R. has been made and a special train will leave Hillcrest at 8:30 A.M. and return from Crow's Nest 8:30 P.M.

Tennis championship games will be played between Coleman and Bellevue football and Mich. and C. Leman baseball. Prizes are to be donated for the winning teams. Bonfires and other contests have been arranged for which suitable prizes have been donated. Great numbers are excepted from the other towns in the Park. The Eagles now at the Summit may burst the bags of there cag and rejoice with their brethren.

## Beyond Doubt

Dinner—Is this really wild duck?  
Waiter—Yes, sir, indeed. Why, we had to chase it round the yard for twenty minutes before we could catch it.

## MADE EGYPT POSSIBLE.

## The Glorious Nile and the Wonders It Has Accomplished.

The Nile is probably the most wonderful river in the world—it has made the desert habitable by turning arid wilderness into the richest land in the world. It has provided at the same time an admirable commercial highway, and made possible the transportation of building materials. The ancient Egyptians were thus enabled to utilize the granite of Assoan for the splendid structures of the hundred temples, and of Memphis, and even for those of Tanis, on the Mediterranean coast.

At a time when the people of the British Isle were clad in skins of wild beasts, the Pharaohs, who built upon the stone altars of the Druids, Egypt was the centre of a rich and refined civilization. Most of the development of Egypt was due to the Nile which, while it did not utilize soil annually, but was and is one of the greatest and best natural highways of the world.

From the beginning of winter to the end of spring—that is, from the time it is impossible to travel, with wind blowing steadily up the stream with sufficient force to drive sailing boats against the current at a fair pace; while, on the other hand, the current is strong enough to carry a vessel without sailing down against the wind, except when it blows a gale. That is why the ancient Egyptians did not need steam power, nor electric motors, for the important construction that covered the Nile, nor for barges carrying building materials for hundreds of miles.

## Popular With the Irish.

Lord Mayo, who met with an accident in the Channel recently, was buried in a casket from Protestant in the Irish sea, is extremely popular in the Emerald Isle. He takes a keen practical interest in the affairs of Ireland, and is devoted to the development of the Irish agriculture. In his work he is warmly supported by the Countess of Mayo. His lordship succeeded to the title in 1872, on the death of his father. He then visited India, who was accompanied while on an inspection visit to the penal colony in the Andaman Islands. Soon after this sad event the Indian Government awarded a pension of £1,000 yearly to the Dowager Countess of Mayo and a lump sum of £30,000 for the benefit of his children.

## Ball Substitute in Egypt.

In Egypt persons placed under police supervision and unable to find the services demanded for future good behaviour are employed. If they so desire, in cultivation or other work at a daily wage.

W. N. U. No. 783.

## TUNNEL OR BRIDGE?

Sir Robert Perks Thinks the Former Would Be Better at Quebec.

The question as to whether the ill-fated Quebec bridge should be replaced by a tunnel instead of another overhead structure was discussed by Sir Robert Perks, Bart., in an interview with The Standard.

He said that the tunnel would be early in May for the construction of a bridge the plans of which have been strongly condemned by The Scientific American, the question being given up.

There are few men more competent than Sir Robert Perks to pronounce on the relative merits of bridge versus tunnel, for the firm of which he is president has been engaged in some of the greatest engineering works of modern times, including the Manchester Ship Canal and the famous Severn Tunnel.

His firm also prepared the plans for the first suspension bridge across the Channel Tunnel between England and France, which scheme was killed by the War Office; while the firm is now completing the first tunnel through the mountains connecting Argentina and Chile by railway.

"The proposal to construct a tunnel instead of the proposed Quebec bridge is a perfectly feasible one," said Mr. Robert recently. "It would undoubtedly in the long run a tunnel would prove far more satisfactory. The St. Lawrence River at that point is not wider than the Severn River, and the tunnel connecting England with South Wales, under what is really the Bristol Channel, is, with its approach, about eight miles long, and took four years to build."

"I take it that a tunnel and approaches for the St. Lawrence River would have to be about the same size. One of the great difficulties is to accommodate houses in crossing the bridge by a tunnel, is the fact that the railways which would make use of it have all been built on the high level, and the grades would have to be changed for tremendous distances."

"As to the question of cost, the big, world-cost, I should say \$12,000,000, you would have to pay the cost of a tunnel at three times the cost of a bridge. The Severn Tunnel cost \$25,000,000."

How little the cost of maintenance compares!" Sir Robert was asked.

"The maintenance of a tunnel is very much less than the maintenance of a bridge," he replied. "With a bridge there is a very large amount of space to be spent on maintenance, and then you have to consider that a bridge shows continual deterioration.

With a tunnel, these conditions apply to a much smaller number of points in the long run; a tunnel is cheaper and more satisfactory than an enormous bridge of this kind. Another consideration is, that while a bridge may possibly serve for a hundred ships of the future to pass under, a tunnel offers no possibility of interfering with river traffic."

Asked how deep the tunnel would have to follow the bed of the river, Sir Robert replied that twenty feet would be ample.

## River Funerals.

A funeral service in the early days of the Red River war was conducted at the request of the deceased and, as a rule, only those attended who had received personal invitations. Either before or after the service relatives were served to eat.

The funeral was to be lengthy and always included a long sermon, which is still the practice in many parts of the country. Hearse were unknown, and to have a coffin carried in the car in front of a vehicle would have been considered as a mark of disrespect to the memory of the departed.

The shrouded coffin was therefore borne on a bier by four men, who even for a short distance relieved by another four, and so on until the grave was reached. It is related that on the death of Hugh Ross, a Hudson Bay factor, his body was carried in this manner for more than nine miles, from Little Britain to St. John's. The journey took a whole day.

At noon the party halted where they had dinner, after which they resumed their slow march reaching the place of burial just as evening was coming on.

And thus the early Selkirk settlers had to pack away their children to till the Red River farms and extend the bounds of the little settlement, to establish what Little Selkirk gave the name of his life.

The greater part of his fortune it survived through many vicissitudes and it survived many dangers; and although it again saw dark days during the brief reign of the Red River Rebellion, it outlived them all and finally expanded into the Province of Manitoba. That Canada has Great West is in some measure due to the fact that the banks of the Red River had the Selkirk set-

## Poor Chap!

A man who used to conduct a lunny colony on Boston Avenue, says it's a hard game. "Being funny in Boston," he says, "is like making faces in church—you don't gain much by it, and you offend a lot of good people."—New York Evening Mail.

Wondrous is the strength of cheerfulness and its power of endurance—the cheerful man will live more in the world than the sad and sullen. Wondrous is the strength of cheerfulness, altogether past calculation in its power of endurance. The cheerful person perfectly must be uniformly joyful—a spirit all wise, graceful from very gladness, beautiful because bright.

## HE INHERITED HIS ILL-HEALTH

BUT DODD'S KIDNEY PILLS CURED J. BAUERGEON'S RHEUMATISM.

Further proof that no case of Kidney Disease can stand before the old reliable Kidney Remedy.

Monte Bello, Labelle Co., Que. (Special)—That a man may be cured even of inherited ill-health if he keeps his blood pure and his body toned with Dodd's Kidney Pills is the experience of John Baugeron.

"I inherited poor health from my parents," Mr. Baugeron says, "and suffered with Rheumatism, Lumbago and Gravel. I was always tired and nervous. In fact I was a total wreck. I tried all kinds of medicines to get well, but till I tried Dodd's Kidney Pills. The side did you no mistake. I took fifteen boxes in all and I am cured."

"My wife also has taken Dodd's Kidney Pills and received great benefit from them. I am perfectly healthy now."

"My wife also has taken Dodd's Kidney Pills and received great benefit from them. I am perfectly healthy now."

A man can get blamed just as hard for trying to do good and failing as for trying to do bad and succeeding.

\* \* \* \* \* BABY CRIED CONTINUALLY

Mrs. Eugene Gagnon, L'Islet Station, Que., says:—"I believe in Dodd's Kidney Pills. They are the best medicine in the world for babies. I have given them to my baby for colic, constipation and sometimes for breaking up a cold. They have been a great relief to them to fail in giving prompt relief. Before I began the use of the Tablets in my baby, was very thin and cried continually."

Worms in children, if they are not attended to, cause convulsions, and often death." Mother Graves' Worm External will protect the children from these distressing afflictions.

Bread will keep moist much longer if kept in a crock, wrapped in several thicknesses of cloth, than if kept in a tin box.

Keep Minard's Liniment in the house.

Gent (engaging new chauffeur)—And to have you any reference from your last employer?

Applicant for situation—No; but I can get some in about a month.

Gent—Why the delay?

Applicant—He's in the hospital.

\* \* \* \* \*

And lots of men have pretty necks and shoulders—but what's the use.

MAINTAIN SKIN PURITY

The constant use of Glycerine Soap, assisted when necessary by Cuticure Ointment, not only preserves, purifies and beautifies the skin, scalp, hair and hands of infants, children and adults, but tends to prevent eruptions. Either before or after the service relatives are served to eat.

The funeral was to be lengthy and always included a long sermon, which is still the practice in many parts of the country. Hearse were unknown,

and to have a coffin carried in the car in front of a vehicle would have been considered as a mark of disrespect to the memory of the departed.

The shrouded coffin was therefore borne on a bier by four men,

who even for a short distance relieved by another four, and so on until the grave was reached. It is related that on the death of Hugh Ross, a Hudson Bay factor, his body was carried in this manner for more than nine miles, from Little Britain to St. John's. The journey took a whole day.

At noon the party halted where they had dinner, after which they resumed their slow march reaching the place of burial just as evening was coming on.

And thus the early Selkirk settlers had to pack away their children to till the Red River farms and extend the bounds of the little settlement, to establish what Little Selkirk gave the name of his life.

The greater part of his fortune it survived through many vicissitudes and it survived many dangers; and although it again saw dark days during the brief reign of the Red River Rebellion, it outlived them all and finally expanded into the Province of Manitoba. That Canada has Great West is in some measure due to the fact that the banks of the Red River had the Selkirk set-

He Knew

—I wonder why there are no marriages in heaven?

Husband—Because it is heaven, of course!

In the treatment of summer complaints the most effective remedy that can be used is Dr. J. D. Kellogg's Dysentry. It is a standard preparation, and many people employ it in preference to other preparations. It is a highly concentrated medicine and its sedative and curative qualities are unsurpassed.

"My boy, never run after a woman or a street car. There will be another one along in a minute or two."—Every body's bigame.

New Lodger (sarcastically)—Is this all the way from the root?

Ladly (decidedly)—Yes, sir. All will allow you.

New Lodger—Well, I'll take two more rooms. I've got to wash my face in the morning.

His Best White Waistcoat.

We put great interest in our products.

And now he's the maddest man in town.

We screwed the pen together, and then—

Put it in his pocket upside down.

—Chicago Tribune.

## An Easy Case

William P. Sheridan, the "detective insurance fraudster" was discussing insurance frauds in New York.

"A very easy case," said Mr. Sheridan smiling, "grew out of a conversation overheard by a friend of mine on a train."

"Two elderly business men sat side by side in front of my friend. Suddenly the first put down his paper, winked and said:

"By the way, how did you make out about that of yours last Sunday?"

"Shut up, you fool!" the other muttered.

"H'm!" said Mr. Wickwire, "there is a great story in this paper. It appears that a man advertised for a week in the same day his wife presented him with two rings, one of which does not show the value of advertising, what does it show?"

"It shows that he confided his greatest anxiety to his wife, and sought to, if possible, impress me uniformly joyful—a spirit all wise, graceful from very gladness, beautiful because bright."

William P. Sheridan, the "detective insurance fraudster" was discussing insurance frauds in New York.

# WITHOUT THE AID OF PUFFS

*The Passing pompadour and  
the incoming swirl*

MANY women possess a crown of glory which they seem to understand as a beauty asset, and ruthlessly throw to the winds chances to greatly add to their personal appearance.

"Oh, I can never do anything with my hair, because, you see, I simply refuse to wear hats, and sausages, or even fair braid; you know, I am with you in your sensible, hygienic decision; but I do not pity any woman who feels that good sense and bad looks are co-existent. They need not be; it is you, who, in truth, a natural disposition of hair, whether it be scanty or thick, can be combined with a sweet becomingness to the wearer."

The right and the wrong ways of arranging your hair are depicted, and the illustrations speak for themselves.

"The 'Passing pompadour,' for instance, is that rapidly declining coiffure of the past. How much can be done with this same hair, without a single artificial addition, is shown in the more favored case of braided hair. The hair is divided in a zig-zag on the sides of the forehead and set at the back of the head. Then it is divided into two strands, each of which is braided separately, and the ends being tucked around the other braid and a barrette used to catch the beginning of each at the back.

Surely you can see the improvement. It is a well-known fact that hair drawn tightly back from the forehead adds to the apparent age of the wearer, while a break in the hair line, due to a soft arrangement, gives a youthful appearance.

I advise brushing the hair until it is soft, lustrous and pliable. Divide it into two strands, each of which is braided and combed back up to the top of the head and secure it in place by hairpins. The front must now be arranged softly over the forehead and ears; be sure to comb with this hair and very division has been set. Braid the ends and form a soft circle on the top; and if you are still inclined to curl one or two can be made with the short ends that are remaining.

When hair is an arrangement for women who have this hair, Miss Jones accepts the fact and in despair throws back the few strands, pinning them in a hard knot on that part of the head that is the most uncomfortable for an arrangement of braided hair. The hair is divided in a zig-zag on the sides of the forehead and set at the back of the head. Then it is divided into two strands, each of which is braided separately, and the ends being tucked around the other braid and a barrette used to catch the beginning of each at the back.

For these women I still hold out the friendly brushing as an excellent help. Make each particular hair to stand straight, so that they can be combined most of a woman's supply. An arrangement of a part at the side is generally good. The soft, wavy line across the

front does not require much hair, but it adds much to the beauty of the back.

Women with thin hair will be best advised to go to the hair dresser, night, in the quiet of your dressing room, study that contour of yours, and

think that you are convinced now what power there is in your own hair.

Do not hesitate to experiment with your hair for, believe me, there is an enormous difference between thin hair and full hair.

Women with the best hair will be best advised to go to the hair dresser, night, in the quiet of your dressing room, study that contour of yours, and

think that you are convinced now what power there is in your own hair.

## ADVICE ON SOCIAL CUSTOMS

*Mrs. Charles Adams  
most cordially invites her friends  
to bring to her their Social  
Problems and Puzzles  
by letter along two  
lines.*

### "THE GREEN-EYED MONSTER"

MY LITTLE talk today is the outcome of many letters which show how really unhappy women, married or unmarried, can allow themselves to become through jealousy. I have read to the lines, and my sincere sympathy goes to any one whose peace of mind and joy are destroyed by this "green-eyed monster."

There are those who maintain that when a person shows jealousy it is an evidence of deep affection toward one. Did it ever occur to you how much harm a jealous woman or man can do by his/her jealousy? Very often, however, jealousy is consistent with jealousy. The first is a much better friend to women than the last.

It is greatly a matter of habit, it rebounds. You remember the lines from Shakespeare's "Othello":

"Iago. Oho! a grasper of jealousy,  
A mock of virtue!"

When disturbing thoughts arise, look for this beast. Do not allow the young man to come near you, or to ask to dance with you unless he was attending a leap-year ball.

### Paying the Fare

Dear Mrs. Adams: I would like to know if it is proper for me to pay for a girl to take me home if one of my parents came to take me home. I would like to pay for her to go along with us.

Dear Mrs. Adams: I would like to know if it is proper for me to pay for a girl to go to school?

Dear Mrs. Adams: I would like to know if it is proper for me to pay for a girl to go to school?

Yes, if your parents do not object.

Captain:

2. No, it is very bad form, in some cases, to pay for a girl to go to school.

3. It is good form for a boy to pay for a girl to go to school.

4. It is a girl's privilege to have first meeting boy acquaintances.

### Attentive Three Years, But Not Word of Love

Dear Mrs. Adams: I am a boy going with a gentleman regarding whom I have no particular regard. He is a good boy, but he has not spoken of love to me.

Some Puzzling Problems

I cannot live without him. How can I tell him in mentioning the subject so that he will not know it to be a pretty girl? I do not want to tell him, but I do not think he can do anything to urge the young man to speak of love.

2. Is it good form for a boy to pay for a girl to go to school?

3. It is good form for a boy to pay for a girl to go to school.

4. It is a girl's privilege to have first meeting boy acquaintances.

A Girl With Many Admirers

Dear Mrs. Adams: I am a young man, but I do not know how to be a pretty girl. I do not want to tell him, but I do not think he can do anything to urge the young man to speak of love.

2. Is it good form for a boy to pay for a girl to go to school?

3. It is good form for a boy to pay for a girl to go to school.

4. It is a girl's privilege to have first meeting boy acquaintances.

An Ounce of Prevention

Dear Mrs. Adams: I am 18 years of age and would like to know if it is proper for me to go to school.

2. If one of my parents came to take me home, I would like to pay for her to go along with us.

3. I would like to know if it is proper for me to pay for a girl to go to school?

MCLEAREN'S MILL NEAR COLEMAN

## FRANK NOTES.

## Hudson Bay Directors

## Have Fight

Western Associated Press Service.

Main Street being too something  
like a street now after two weeks'  
treatment by Contractor Anderson  
and his men.much sympathy is felt with Dr. and  
Mrs. Macleod through the illness  
of their only daughter, who has undergone  
an operation for appendicitis. We are pleased to learn that she is  
doing well.Frank is beginning to look bus-  
y again now that the strike has been  
settled.The contractors are making good  
progress with the cottages for the  
C. C. C. Co.G. E. C. Martin and family have left  
Frank to reside in Lethbridge, where  
he has taken a position.

## Another Opera

The Claman Co. is coming to  
Coleman on May 27th, this company  
includes several star ac-  
tors and actresses and carries a  
14 piece band and a 6 piece or-  
chestra.The play entitled "Are You  
Crazy" will be played and it is  
of the most laughable ever put  
on the boards.Chamberlain's Stomach and Liver  
Tablets will clear the sour stomach,  
sweeten the breath and create a  
healthy appetite. They promote the  
flow of gastric juice thereby inducing  
good digestion. Sold by all Dealers.
